

## TECHNICAL SPECIFICATION

### Glass and Tile Drill

### Application

Glass and Tile Drill is used for drilling through soft to medium hard tiles, ceramics and non-tempered glass. A sharpened tungsten carbide tip provides clean and precise holes.

### Technical Data

- Grip: Cylindrical shank
- Body: Made of high-quality steel
- Tip: Made of tungsten carbide
- Direction: Right rotation

### Characteristics

- For rotary drilling only / hitless /
- Low machine speed is used
- Sufficient cooling with water /or other liquid/ for better drilling results is needed
- General-use drill

### Advantages

- Hard sharpened tungsten carbide tip for faster drilling and increased durability
- Clean and precise holes
- Optimal solution for drill "Hobby" series
- Individual blister pack
