TECHNICAL SPECIFICATION

Adaptor for Bi-metal Hole saw Ø32-152 mm hexagon

KAMtools

Application:

The KAMtools adaptor for Bi-metal Hole saw is for hole saws with a diameter from **Ø 32** to **Ø 152 mm**. Supplied with hardened alloy high-speed steel centering drill. Suitable for drilling wood, plastic and metal. Hex shank grip, allows mounting in any universal chuck. The center drill makes the initial drilling precise and accurate. The bit change system allows you to quickly and easily change the bit without using a key. Suitable for use with hand tools.

Specifications:

- used in combination with drill saw for metal HSS bi-metal (sold separately)
- in a set with central drill bit ground from HSS steel
- grip type – hexagon
- diameter of the guide drill bit Ø6,35
- for hole saw with diameter Ø32-152 mm
- for drilling without impact

Advantages:

- **Convenience:** Fast and easy change of the tools
- **Practicality:** Possibility of mounting any universal chuck
- **Compact:** Individual blister
