

## TECHNICAL SPECIFICATION

Die stock DIN 225

M3 - M12

brand  
 **KAMtools**

## Application

The main application of the die stock is to fix /lock/ the die to the cylindrical socket and provide a rotary movement for thread cutting. Fixing is done by locking screws. The socket-mounted handles ensure additional power for easier rotary movement and transmission of threading effort.

## Technical parameters

- Diameter of the socket: 25 mm
- Height of the socket: 9 mm
- Fixing screws: 5 pieces
- Full length: 210 mm
- Diameter of the handles: 8 mm
- Material of the body: alloy
- Material of the handles: steel
- Applicable for dies from M1 to M12 with outer diameter of 25 mm

## Advantages

- **Quality:** High quality materials used for the manufacture of the socket and handles.
- **Convenience:** Knurled handles for prevention of slipping during turning.
- **Practicality:** Handles can be unscrewed.
- **Multifunctionality:** Usage of one die stock for all dies offered by KAM-04 Ltd.
- **Compactness:** Individual blister package.
